

Schedule for Thematic Session II:
Geometry of Banach spaces in Operator Theory
Lecture Hall II of the Mathematics Department

Organizer: T S S R K Rao

Monday, December 16

Time	Speaker	Title
14:15 – 15:00	Lajos Molnar	Isometries of certain nonlinear spaces of matrices and operators
15:00 – 15:45	V. Indumathi	Polyhedral conditions and Best Approximation Problems

Tuesday, December 17

This session has no talks on 17 December.

Wednesday, December 18

Time	Speaker	Title
14:15 – 15:00	Vrej Zarikian	Bimodules over Cartan Subalgebras and Mercer's Extension Theorem
15:00 – 15:45	Jiri Spurny	Baire classes of Banach Spaces and C^* - Algebras
15:45 – 16:30	A. K. Roy	On Silov boundary for function spaces

Thursday, December 19

Time	Speaker	Title
14:15 – 15:00	S. Dutta	Predual of completely bounded multipliers
15:00 – 16:30	K. Paul, Jayanarayanan C.R., A. Bhar, T. Paul	Short talks
